S&W STONE & WEBSTER™

A WESTINGHOUSE ELECTRIC COMPANY

For more than a century, Stone & Webster and its legacy companies have been among the Energy sector's most trusted and experienced partners.

We provide comprehensive capabilities to plan and implement your most demanding projects.

Stone & Webster has a strong heritage in the Oil & Gas and petrochemical industries.

Today's revolution in upstream shale fracturing production is creating infrastructure needs for the midstream and downstream sectors. Successfully navigating the dramatic growth and changing energy economics requires a partner with deep experience and insight, a partner with both technical acumen and financial expertise.

Stone & Webster has infrastructure solutions for the petroleum and chemical industries.

Our engineers offer broad experience, and our mechanical construction skills and technology were forged in the toughest physical and financial environments. We are called upon to deliver in critical path projects and have the resources to ensure that your return on investment is optimized.

Stone & Webster offers:

- An extensive portfolio of precision mechanical services and engineering talent in a single source for your infrastructure design and operations
- An unmatched heritage of Energy sector solutions, with innovation and creativity applied to deliver exceptional solutions
- A focus on maximizing your return on assets with technology and engineering expertise enhanced by business and financial acumen
- EPC services for your infrastructure needs

Our solutions are based on technical innovation, creative engineering and industry experience

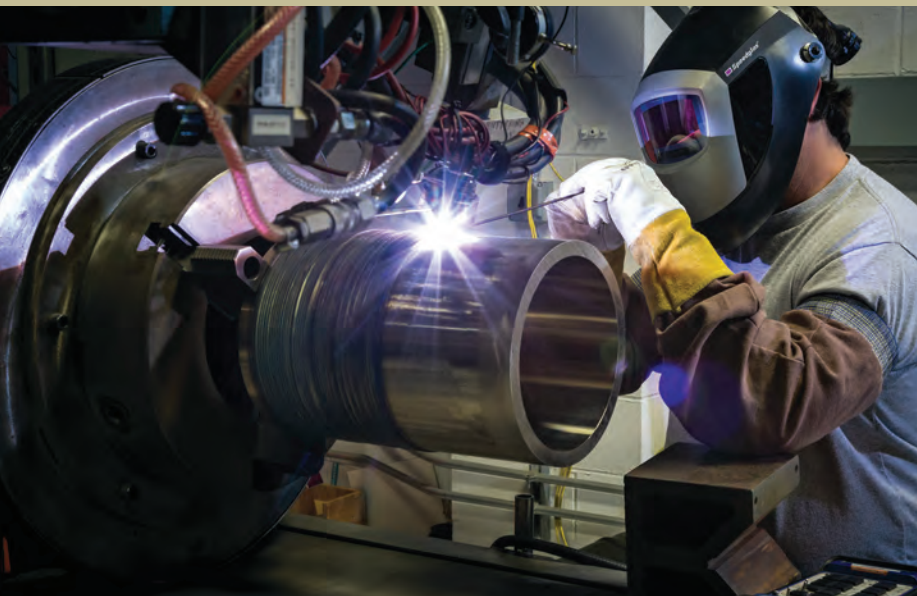

TRUSTED AND PROVEN SOLUTIONS FOR DYNAMIC OIL & GAS AND PETROCHEMICAL MARKETS

PROFESSIONAL SERVICES:

Engineering, Procurement and Construction (EPC)
Design-Assist
Staff Augmentation
Project Management
Materials Management
Construction Management
Geotechnical Services
Sitting and Permitting

OUR PORTFOLIO - A SINGLE SOURCE FOR YOUR INFRASTRUCTURE NEEDS

SPECIALIZED SOLUTIONS:

Specialty Welding and Machining
Comprehensive Non-Destructive Examination (NDE) Systems and Services
Component and Heavy Vessel Manufacturing
Environmental Compliance
Process Equipment Manufacturing
Risk and Asset Integrity Modeling
Process Safety
Cyber Security

OUR PROMISE - EXECUTION CERTAINTY THAT ENSURES YOUR PROJECT'S SUCCESS

PROJECT EXPERIENCE:

Pipeline Construction and Mechanical Construction
Geothermal Systems
High-pressure/High-alloy Mechanical Systems
Remediation and Deconstruction
Compressor Stations

THE STONE & WEBSTER STORY

Our roots go back to Charles Stone and Edwin Webster, who established Stone & Webster in 1889 as one of the first electrical engineering consulting firms in America. The company they founded would become one of the most influential and iconic engineering and construction firms in the nation. Throughout the years we kept our commitment to serving heavy industrial projects – including the petroleum and chemical sectors – with process and environmental solutions. Today we continue our proud tradition of engineering and innovation as a Westinghouse Electric company.
